3. Recommended Features for CASEORA 2.0

1. AI Legal Research Assistant — HIGH PRIORITY

Search relevant legal material and potentially relevant cases. Show case name, court, year, relevant section/Act, important points, citation and relevance.

2. AI Document Analyzer

Analyze judgments, orders, petitions, FIRs, agreements, affidavits and notices. Extract important facts, dates, parties, sections, obligations, risks and clauses.

3. AI Citation Extractor

Automatically identify case citations, Acts, sections, regulations and constitutional references from uploaded documents.

4. AI Legal Q&A;

Add an "Ask CASEORA AI" feature for questions such as case summaries, missing documents, previous hearing history and explanations of uploaded orders.

5. Legal Workflow Engine — HIGH PRIORITY

Create guided workflows for case types such as bail: register case → collect documents → prepare application → file → hearing → order → compliance → archive.

6. Client Portal

Give each client secure access to their own case information, hearing dates, shared documents, updates and payment status.

7. Client Communication

Provide in-app messages, case notifications, document sharing and calling/communication options.

8. Billing & Expense Management

Track consultation fees, case fees, payments received, pending amounts, invoices and case-related expenses.

9. Payment Links

Allow advocates to create a payment request for a client and share a payment link.

10. AI Document Generator

Generate draft documents such as notices, applications, affidavits, replies, agreements and petitions for advocate review.

11. AI Contract Review

Identify important clauses, obligations, possible risks, deadlines, payment clauses and termination clauses in contracts.

12. Similar Case / Precedent Finder

Compare case facts, legal sections, issues and documents to identify potentially relevant similar cases or precedents.

4. Recommended CASEORA 2.0 Feature Set

Core additions: AI Legal Research Assistant, AI Document Analyzer, Legal Citation Extractor, Similar Case/Precedent Finder, AI Legal Q&A, AI Document Generator, Legal Workflow Engine, Client Portal, Billing & Expense Management, and Client Communication.

Keep CASEORA's existing USP: Case Registration → Hearing → Case Diary → Tasks → Documents → Exhibits → Orders → AI Summary → AI What Happened? → AI What Next? → Timeline → Disposal → Archive.

5. Suggested Product Positioning

“CASEORA — An AI-powered end-to-end legal practice and case management platform for advocates.”

LegalKart's strength is client communication, business features and payments. v-Lawyer's strength is AI, legal research, document intelligence and workflows. CASEORA's strength is structured case lifecycle management, hearings, case diary, timeline, tasks, team management and security. Combining these strengths can make CASEORA a more complete platform.

Note: AI-generated legal information should assist advocates with organization and document understanding. Important legal conclusions and factual/legal decisions should always be verified against original court records and applicable law.
