Bare Acts	Reference	Links	Major feature	The Act itself
Legal drafts	Optional	No	10,000+	No
Legal news	Optional	No	Yes	No
Primary users	Advocates	Citizens & courts	Advocates & students	Legal system

The Most Important Difference

CASEORA: Manage the advocate's complete private workflow: Case → Client → Hearing → Diary → Task → Documents → Exhibits → Orders → AI Summary → Timeline → Disposal.

eCourts: Find official case status, CNR, hearing dates, orders and court services.

Court Book: Find and understand the law through Bare Acts, judgments, Constitution, bills, legal drafts, legal news and AI legal search.

Advocates Act, 1961: Legal framework governing advocates and Bar Councils; it is not an app.

CASEORA's Strongest Differentiation

eCourts provides official court information, Court Book provides legal research resources, and CASEORA manages the advocate's private end-to-end case workflow by connecting hearings, case diaries, tasks, documents, exhibits, orders, AI summaries, timelines and disposal in one secure workspace.
